## PROFESSIONAL SUMMARY

Detail-oriented QA Tester and Computer Engineering student with hands-on internship experience executing full test cycles for web and mobile applications. Proficient in manual testing, regression testing, functional testing, API testing, UAT, and mobile testing. Skilled in Selenium, JIRA, SDLC, and STLC. Complementary full-stack development background in HTML, CSS, JavaScript, Python, Node.js, Flask, and Django. Passionate about delivering defect-free, high-quality software through systematic quality assurance processes.

## CORE COMPETENCIES

**QA & Testing:** Manual Testing, Regression Testing, Functional Testing, API Testing, UAT, Mobile Testing, Automation Testing, Selenium, JIRA, Test Case Design, Bug Tracking, SDLC, STLC

**Web Development:** HTML5, CSS3, JavaScript, Node.js, Express.js, Flask, Django, PHP

**Databases:** MySQL, MongoDB

**Programming:** Python, JavaScript, PHP

**Tools & Platforms:** Git, GitHub, WebRTC, Socket.io, Render, Vercel, Supabase, OpenCV, Spotify API, YouTube API

## WORK EXPERIENCE

**QA Tester (Intern)** | Jashma Info Soft Pvt Ltd, Vadodara

Jan 2026 – Apr 2026

- Executed comprehensive manual test cases for web and mobile applications, identifying and documenting defects in JIRA across multiple release cycles.
- Performed regression, functional, and UAT testing to ensure consistent product quality and stability before each deployment.
- Conducted API testing to validate request/response behavior, status codes, and endpoint reliability.
- Collaborated with developers to reproduce, track, and verify bug fixes, reducing defect resolution turnaround time.
- Supported SDLC and STLC processes including test plan creation, execution reporting, and sign-off documentation.
- Performed mobile application testing across multiple devices and OS versions to ensure cross-platform compatibility.

**Web Designer (Intern)** | Maximux Completion System, Vadodara

Jun 2021 – Jul 2021

- Designed and maintained live client web projects, gaining hands-on experience with front-end development best practices.
- Collaborated with the internal team to deliver responsive, client-ready web interfaces on schedule.
- Gained exposure to the full project lifecycle from requirement gathering to deployment on live servers.

## PROJECTS

**Share Me – Real-Time Peer-to-Peer File Transfer App**

Sep – Oct 2025

**Tech Stack:** HTML5, CSS3, JavaScript, Node.js, Express.js, WebRTC, Socket.io, Git, Render | [share-me-os92.onrender.com](https://share-me-os92.onrender.com)

- Built a production-ready P2P file transfer app using WebRTC and WebSocket protocols, eliminating cloud dependency and file size restrictions.
- Implemented real-time device discovery and signaling with Socket.io, enabling seamless and secure browser-to-browser file sharing.
- Deployed to Render with a full CI/CD pipeline managed via GitHub; live and publicly accessible.

**Emotion-Based Music Recommendation System**

Jun – Sep 2025

**Tech Stack:** HTML5, CSS3, JavaScript, Flask, NumPy, OpenCV, Supabase, Spotify API, YouTube API | Team Size: 3

- Developed an AI-powered web app that detects user emotions in real time via webcam or image upload using OpenCV and machine learning.
- Integrated Spotify and YouTube APIs to deliver personalized music recommendations based on detected facial expressions.
- Architected the backend using Flask and Supabase for persistent sessions, scalable data storage, and API management.

## Resort Management System (RMS)

**Tech Stack:** HTML, CSS, JavaScript, PHP, MySQL | [resort-management-system-sigma.vercel.app](#)

- Developed a full-stack hospitality management platform covering reservations, room management, guest services, and automated billing.
- Designed a normalized MySQL relational database schema to handle multi-entity resort operations efficiently at scale.
- Built an intuitive front-end interface for seamless check-in/check-out workflows and real-time room availability tracking.

## Personal Portfolio Website

**Tech Stack:** HTML, CSS, JavaScript, Web APIs | [rajportfolio-mu.vercel.app](#)

- Designed and developed a 3D interactive personal portfolio showcasing projects, skills, and experience with advanced CSS animations.
- Implemented JavaScript Web APIs to deliver a unique, immersive user experience.

## EDUCATION

---

### B.Tech. (Lateral) – Computer Engineering

2023 – 2026

Parul University, Vadodara | CGPA: 7.93 / 10

### Diploma – Computer Engineering

Completed 2023

S.B Polytechnic, Savli, Vadodara (GTU) | CGPA: 6.37 / 10

### 10th Standard (GSEB)

Completed 2018

ST. Joseph's High School, Vadodara | 55.55%

## CERTIFICATIONS & ASSESSMENTS

---

- Python Programming Certification — Score: 85 / 100
- IoT (Internet of Things) – Sensors, Microcontrollers & Fundamentals — Score: 72 / 100
- Campus Management System – Project Fair, S.B Polytechnic, Savli — Certificate of Participation

## ACHIEVEMENTS & ACTIVITIES

---

- Developed a 3D interactive personal portfolio website using modern web technologies, animations, and JavaScript Web APIs.
- Contributed to open-source projects and independently completed multiple UI/UX design initiatives.
- Showcased Campus Management System at an institute-level Project Fair; received a recognition certificate from faculty.
- Consistent self-learner — regularly explores new technologies through documentation, tech blogs, and hands-on side projects.

## LANGUAGES & INTERESTS

---

**Languages:** English, Hindi, Gujarati

**Interests:** Open Source Contributions • UI/UX Design • Tech Blogs & Books • Photography • Traveling
